

## PUMP TANKS

Pump Tank Specifications									
Nominal Volume (gal)	Skid Width A (in)	Skid Length B (in)	Skid Height C (in)	Tank Width D (in)	Tank Length E (in)	Tank Height F (in)	Overflow Connection (NPT)	Drain Connection (NPT)	Make-up Connection (NPT)
250	56	82	62	48	30	54	4	1	1
500	56	100	68	48	48	60	4	1	1
1000	80	110	80	72	50	72	4	1	1
1500	80	124	80	72	72	72	4	1.5	1
2000	104	153	80	96	72	72	4	1.5	1
3500	128	175	92	120	84	84	6	2	1
5000	176	175	92	168	84	84	6	2	1

Pump Tanks can be insulated for use in chilled water applications.  
Pump Tanks can be built in either Stainless Steel or Epoxy Coated Carbon Steel.  
Dimensions are approximate and may vary due to sizes and number of pumps and/or addition of controls.  
All pump tanks can be designed with the split deck option for ease of handling and shipment.  
Pump tanks 2000 gallon and above come standard with split deck design for ease of shipment.
